Tom, please see the list I provided to the Houston Lab. This is the list I requested for the samples to be collected during this next field event.

We did sample PCBs and pesticides for all of the residential properties. We did not get any hits of PCBs in any of the yards, but this was not expected.

My understanding is that these samples will be in taken within close proximity to, if not within suspected areas of contamination. We need to rule out PCBs, so we need to analyze for it. The lab cannot analyze for chromium 6 or tetraethyl lead; therefore, if we are planning to take sample from the process area and these are what we need, then we will need to contract out for these.

Here is the contact for the Houston Lab CLP

Jon – I do not believe they recycled oil.

Katrina – Have you analyzed for or found PCBs at any of the other refinery projects? Do you want PCBs included in our analyte list for Wilcox?

Tom and/or George,

In your knowledge of the Wilcox and neighboring refinery, did they ever recycle oil? If they did, we may want to add PCBs to our analyte list. Let me know your thoughts.
